

The Lab

Clara Callista
Lukito

“Currently, 9 out of 10 experimental drugs FAIL in clinical studies because we cannot accurately predict how they will behave in people based on laboratory and animal studies.”

- Michael O Leavitt

Former secretary for the US
Department of Health and
Human Services

Hi, my name
is 39765

And this is
my story

I have been here since
the first time I opened
my eyes

I was given
everything that
I ever wanted

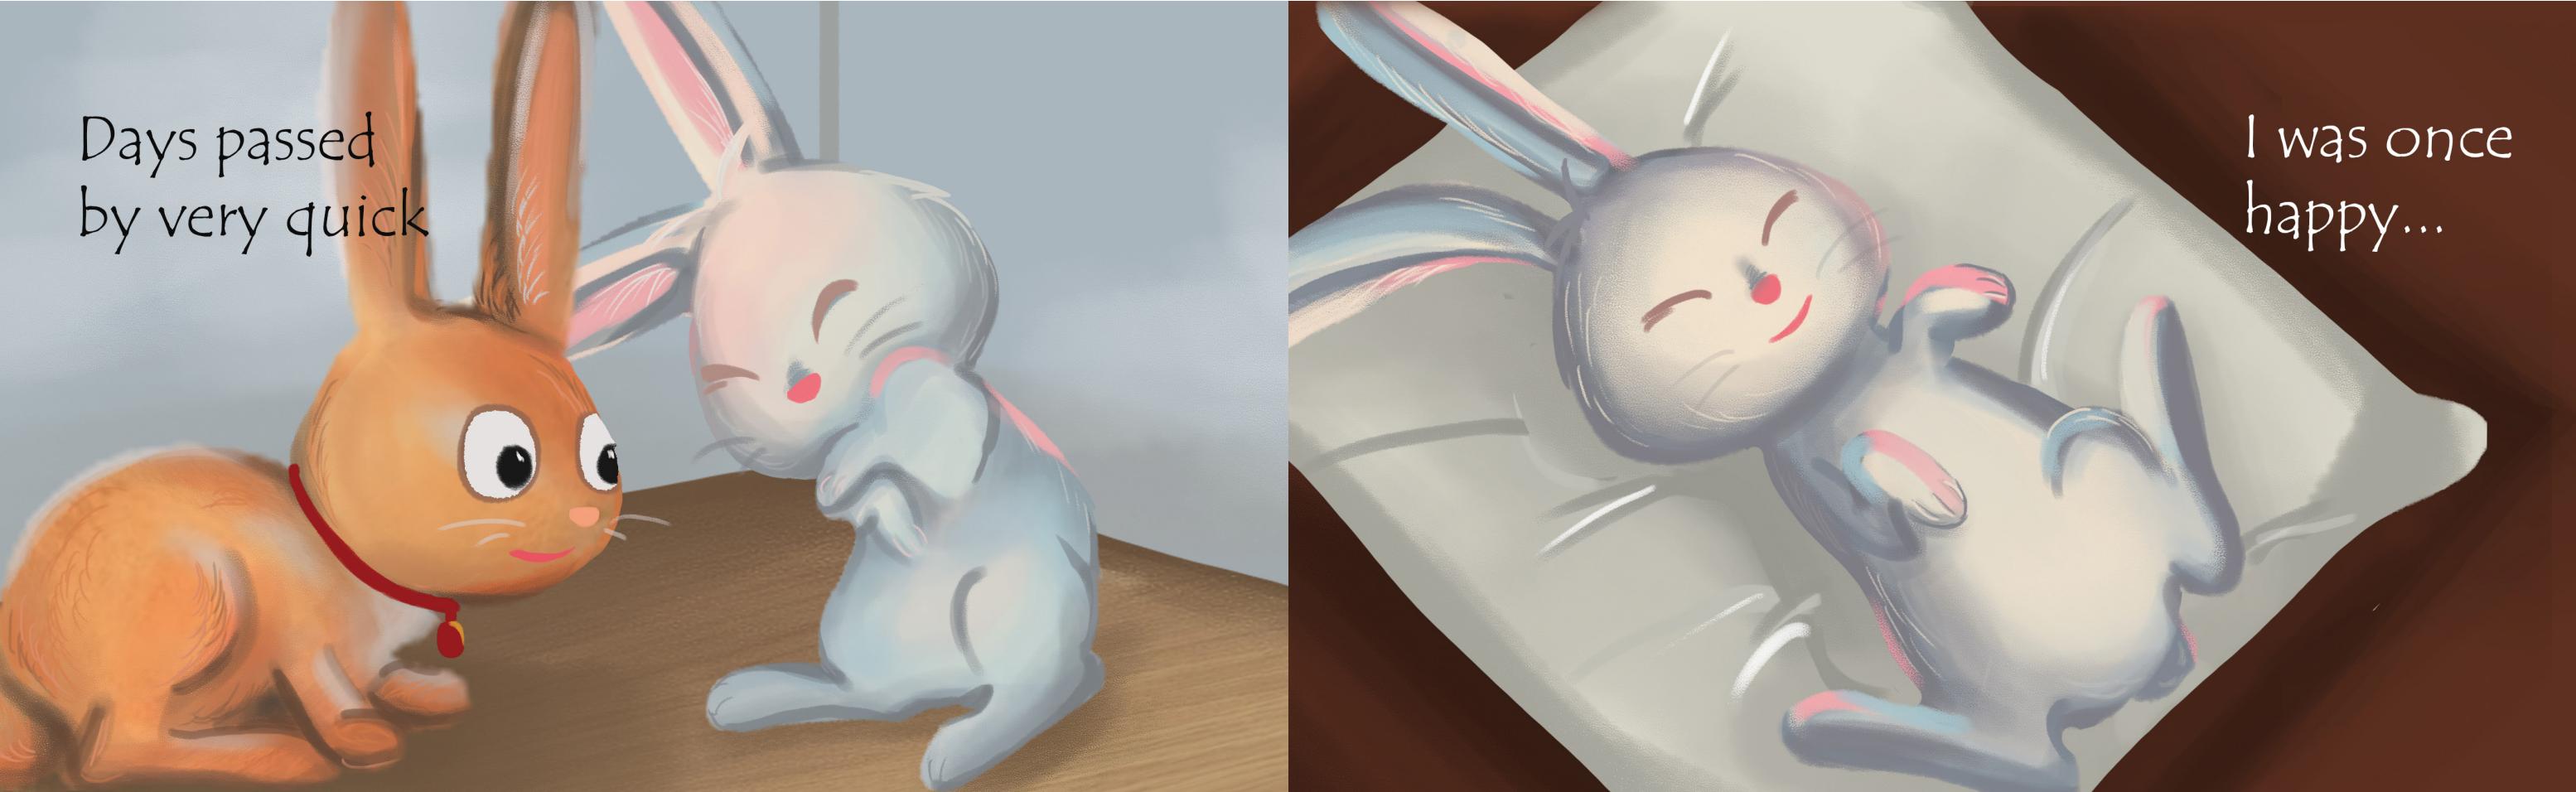

Friends...

Food...

And love...

Days passed
by very quick

I was once
happy...

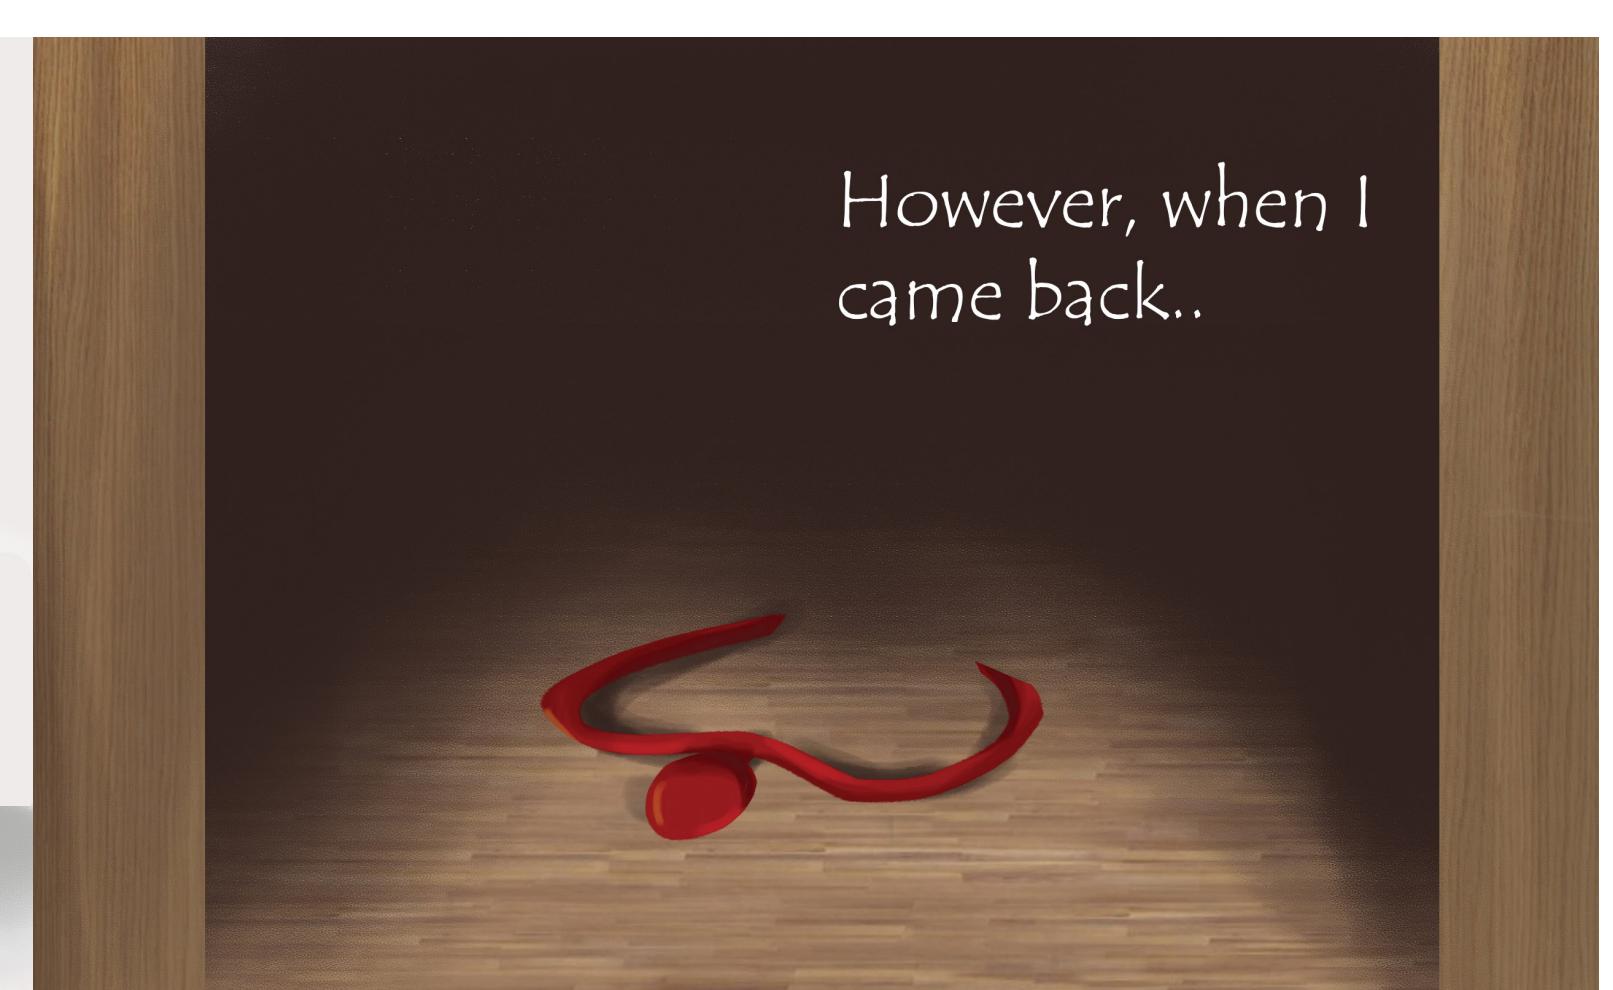

I was playing around
with my friend

when the bell
rang...

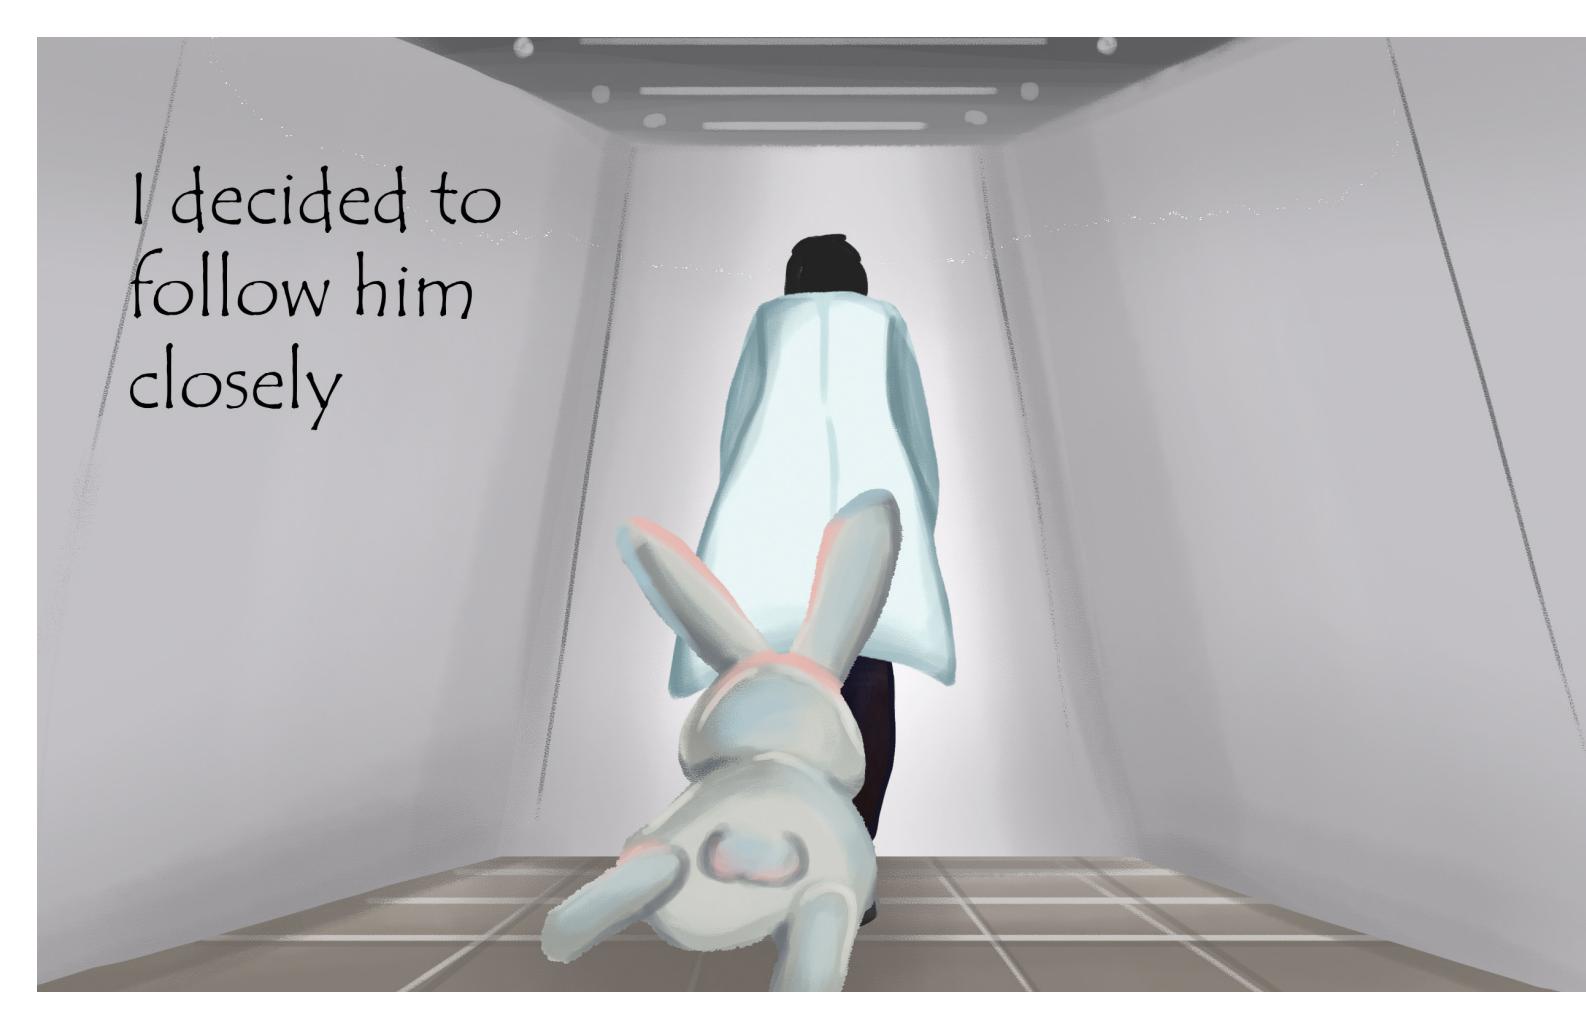

for the monthly
check-up

However, when I
came back..

Only my friend's
collar could be
found

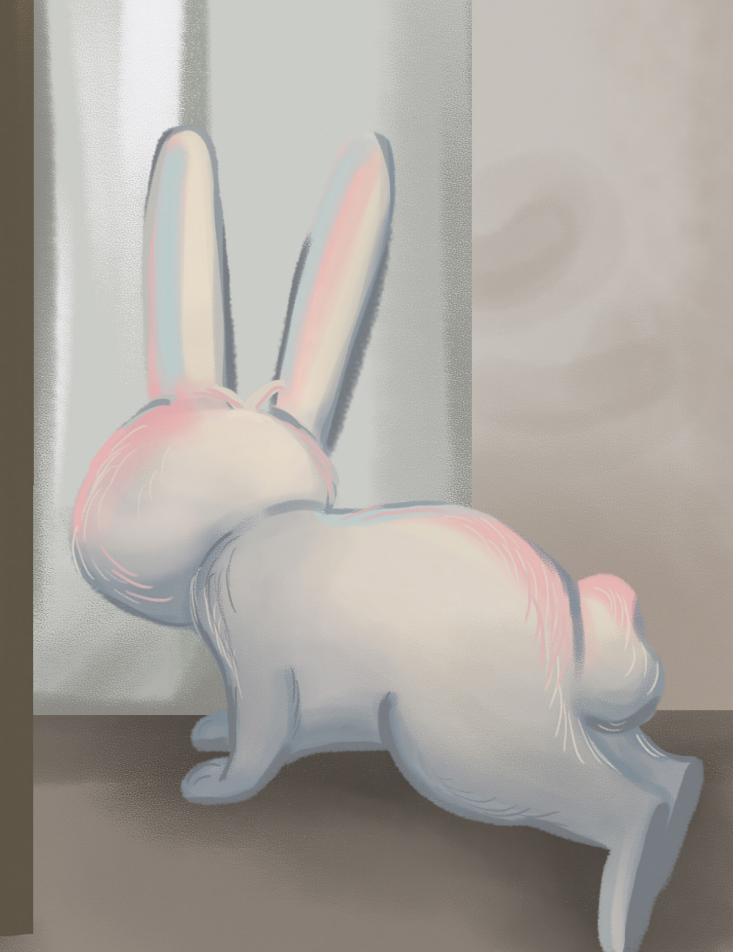

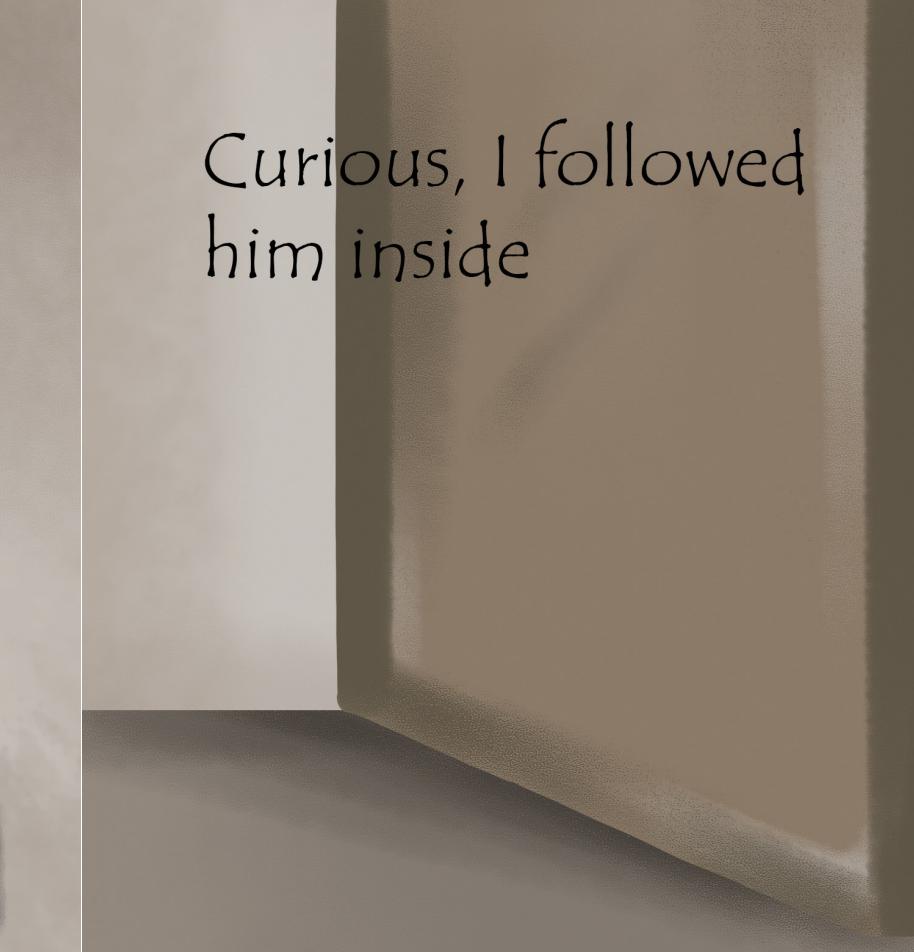

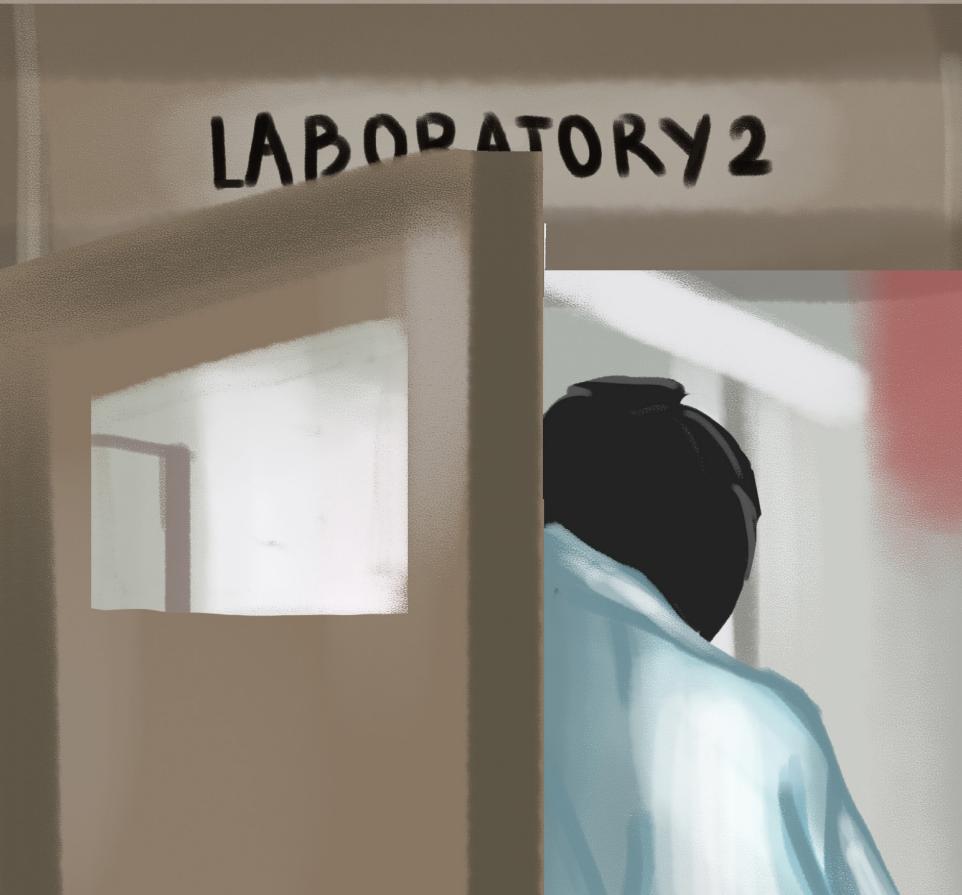

I decided to
follow him
closely

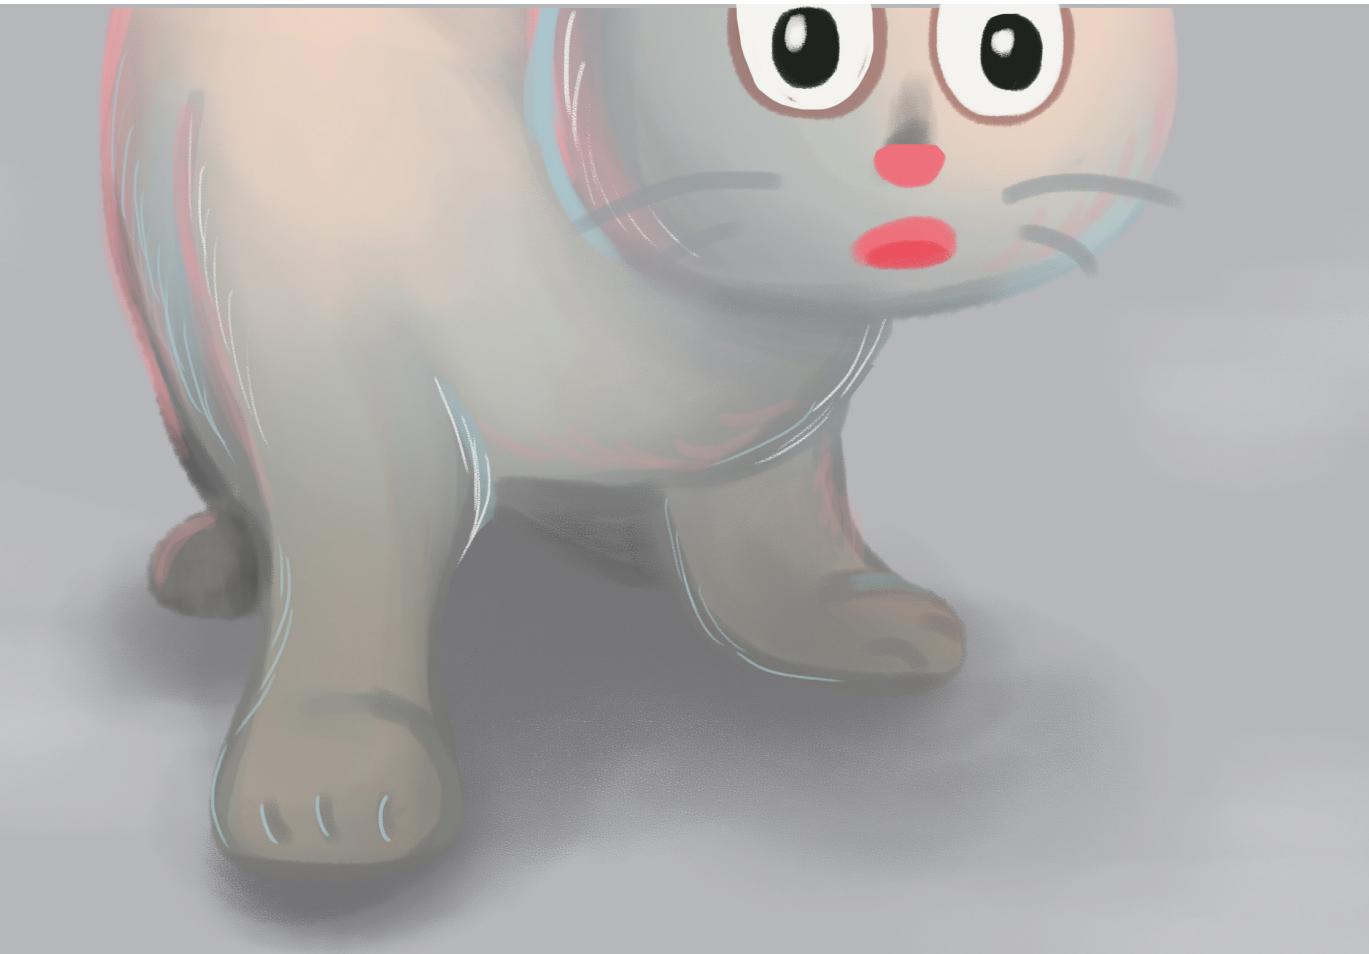

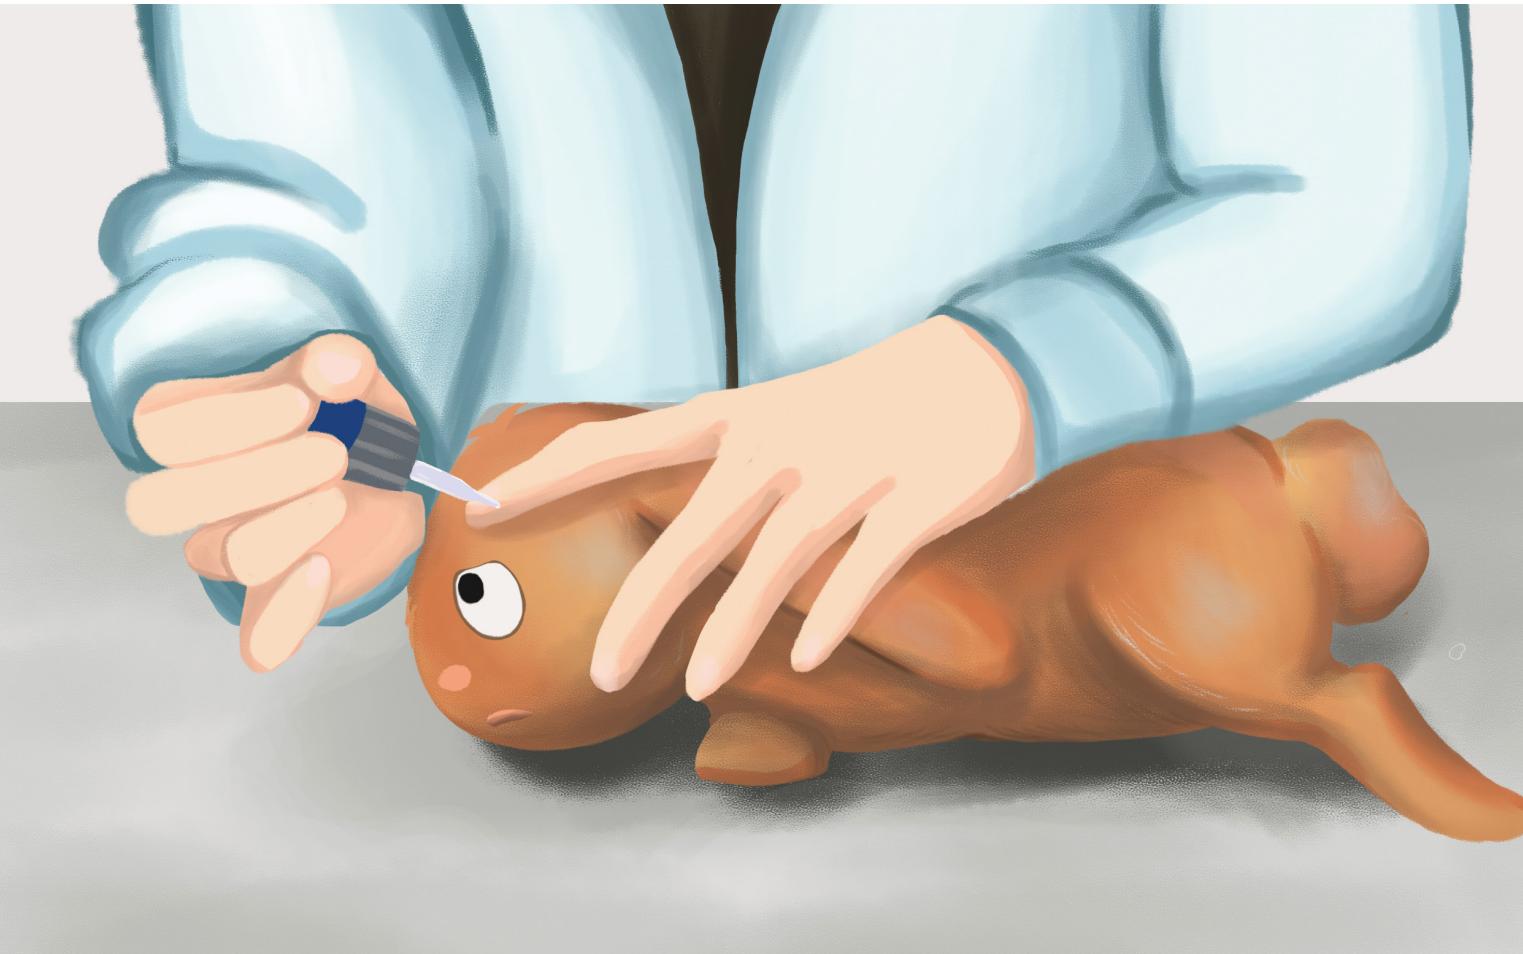

In hope he would
lead me to my friend

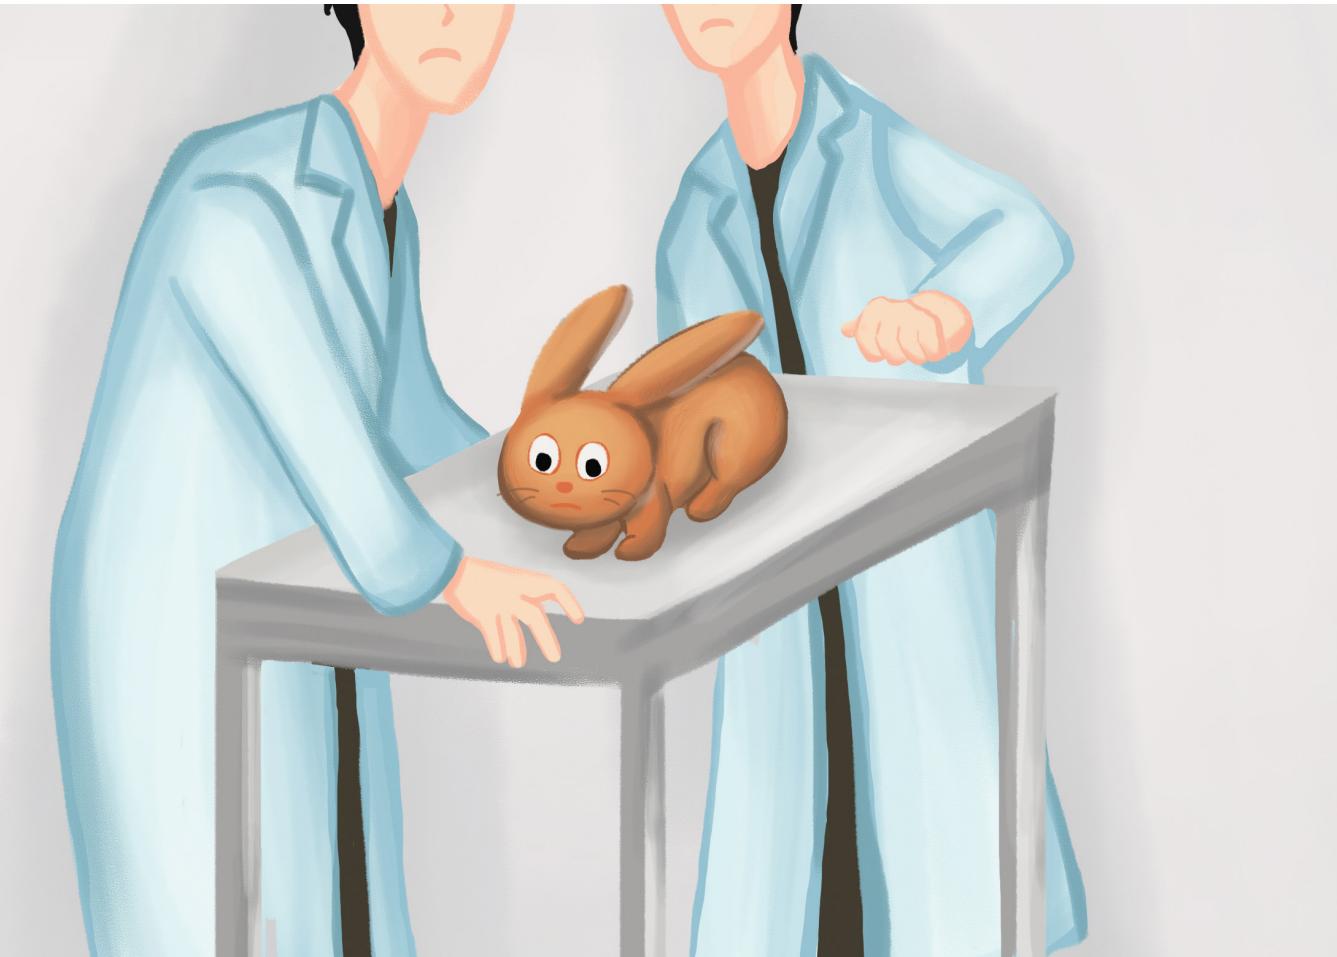

But instead I ended up in
an unfamiliar place

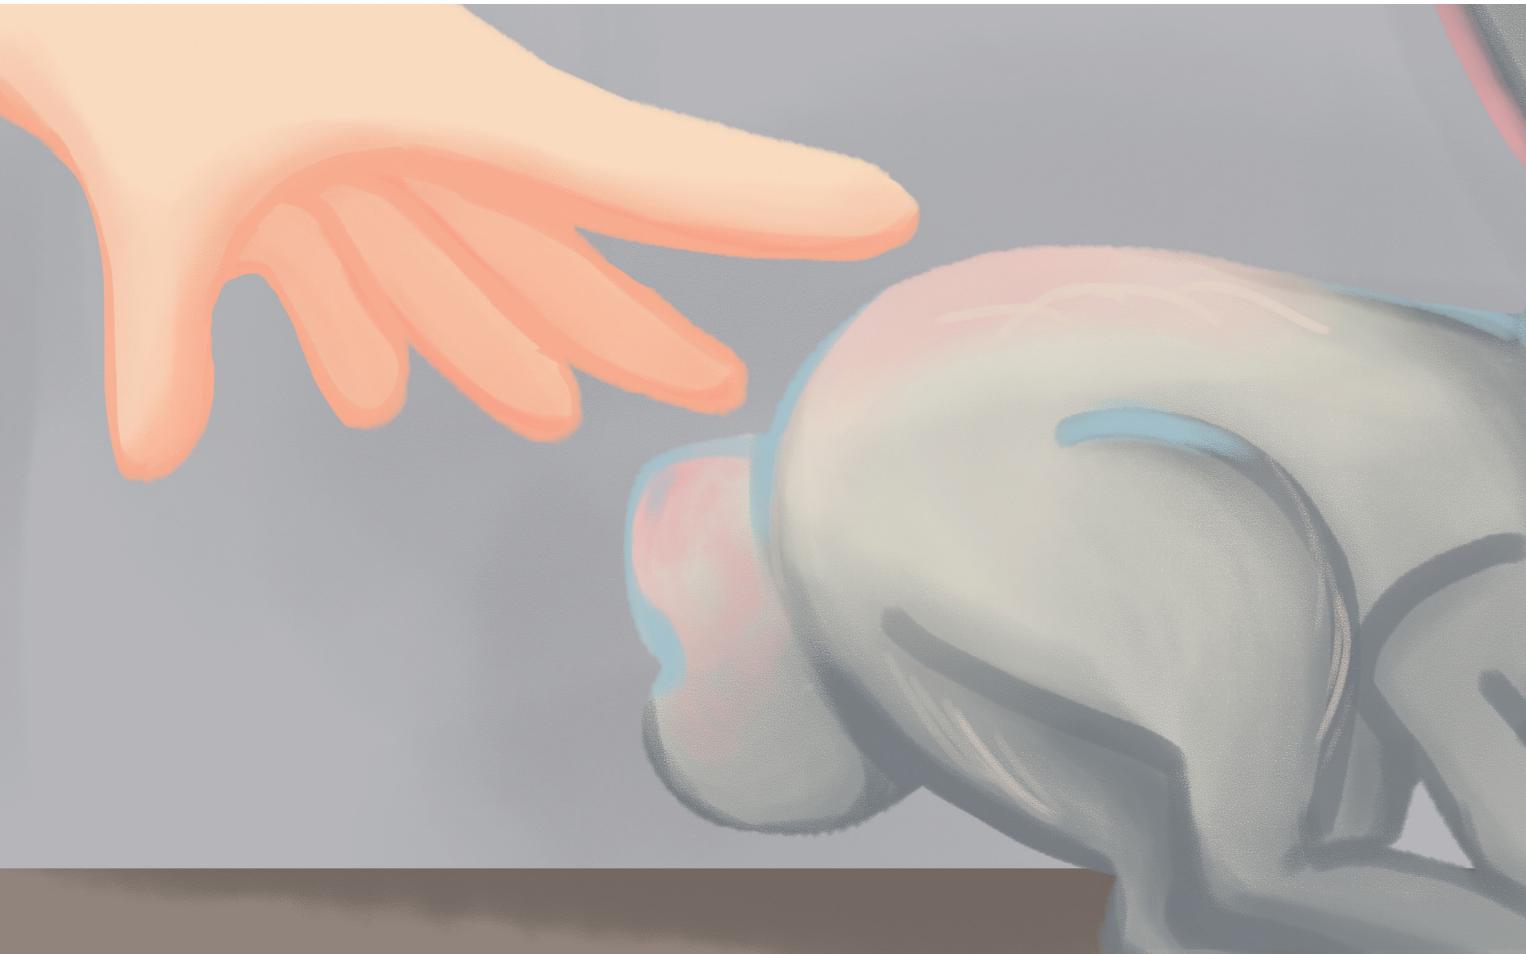

Almost!

In the end I
am merely an
object for them
